EXCEL EXAM

1. Compute the data given in the next page of this paper.
2. In cell A3, type "Position" and Use autofill handle to generate auto numbers in cell A4:A28. Use RANK function to generate positions using totals criteria.
3. Use conditional formatting to identify scores below 50 and above 50 in column D.
4. Use list function to generate their counties
5. In cell I4, type 20 as bonus score
6. Using relative cell referencing, compute bonus score with a condition that a student only gets addition of the bonus if the total is more that 250, otherwise the cell displays void("").
7. Calculate the total score in column J where total score=bonus score plus totals
8. Calculate mean score and use average in row 29
9. Generate remarks section in column K with the grading system below;

0 – 100:	FAIL
101:200	REFER
201 – 300	PASS
301 – 400	CREDIT
401 ++	DISTINCTION

10. Below your data, skip three rows and in the next row, merge seven cells and type 'Search System'. Below it, use VLOOKUP function to generate a simple system that users can single out individual summative scores.
11. Insert a 3D pie chart with a tittle 'Graphical Analysis' and move it to a new sheet
12. Save your work in your folder with your name followed by Excel exam; e.g: 'Stanley-Excel Exam'
