ACCESS EXAMS

Part A: Table Creation (30 minutes)

- Create a database named **StudentRecords.accdb**.
- Build a table called **Students** with the following fields:
 - StudentID (Text)
 - FullName (Text)
 - Course (Text)
 - Age (Number)
 - Address (Text)
- Enter at least **10 sample records** of your choice.
- **Note:** Do not set primary keys or validation rules.

Part B: Form Design (20 minutes)

- Create a **simple form** based on the **Students** table.
- The form should allow:
 - Adding new student records
 - Editing existing records
 - Navigating through records

Part C: Queries (30 minutes)

Create the following queries:

1. **List all students** enrolled in a specific course (e.g., "Computer Science").
2. **Find students above age 20.**
3. **Sort students alphabetically** by FullName.
4. **Count the total number of students.**

Part D: Reports (40 minutes)

- Generate a **report** showing all student details.
- Group the report by **Course**.
- Add a **summary** at the end showing the total number of students per course.
