

Microsoft Access Practical Classwork

Instructions: Design a table named **Students** in Microsoft Access. Apply the constraints where specified.

Section A: Table Design

Field Name	Data Type	Field Size	Constraint Type	Constraint Example
StudentID	AutoNumber	—	—	Primary Key (AutoNumber)
FullName	Short Text	50	Validation Rule	Is Not Null → Validation Text: "Name cannot be left blank."
Age	Number	Integer	Validation Rule	>= 18 And <= 35 → Validation Text: "Age must be between 18 and 35."
Gender	Short Text	10	Lookup Wizard	Options: "Male", "Female", "Other"
PhoneNumber	Short Text	13	Input Mask + Rule	Input Mask: +2540000000000 → Validation Rule: Like "+254*" And Len([PhoneNumber])=13
Location	Short Text	30	—	No constraint applied
Email	Attachment	100	Validation Rule	Like "*@*.*)" → Validation Text: "Enter a valid email address (e.g., name@mail.com)."

Section B: Practical Application

Qn	Instruction	Expected Output
1	Enter a record: FullName = "Mary Atieno", Age = 22, Gender = "Female", PhoneNumber = "+254712345678", Location = "Siaya", Email = "mary@gmail.com".	Record saved successfully.
2	Try entering Age = 15.	Error message: "Age must be between 18 and 35."
3	Try leaving FullName blank.	Error message: "Name cannot be left blank."
4	Try entering PhoneNumber = "0712345678".	Error message: "Phone number must begin with +254 and have 9 digits."
5	Try entering Email = "marygmail.com".	Error message: "Enter a valid email address (e.g., name@mail.com)."

6	Select Gender field when entering a new record.	Dropdown list appears with options: Male, Female, Other.
---	---	--

Section C: Short Answer

Qn	Question	Answer (Table Format)
7	Why is an Input Mask used in Access?	Ensures consistent data entry format (e.g., phone numbers).
8	Why is a Validation Rule important?	Restricts data entry to meet specific conditions.
9	What is the role of Validation Text ?	Provides feedback/error messages when rules are violated.
10	What is the purpose of the Lookup Wizard ?	Creates dropdown lists for fields, ensuring standardized values.
