

RURALNET ICT ACADEMY – UGUNJA

EXCEL PRACTICAL

The management of an organisation intends to use a spreadsheet program to computerise the earnings generated by each truck and the commission paid to each truck driver between the months of January to March as shown in Figure 1 below.

Figure 1 – Truck Earnings Table

E_NO	TRUCK DRIVERS	TRUCK NO	JAN	FEB	MARCH	GRAND TOTAL	DRIVERS COMMISSION
	Harun	KJT 123	35700	43500	23000		
	John	KRY 345	33000	25000	21000		
	Eunia	KZZ 467	45000	18000	17000		
	Aloice	KUT 383	45200	33000	22000		
	Martin	KGG 234	32000	12000	23000		
	Ernest	KLM 123	14500	23400	14500		

Tasks

- A. Open your workbook program then add a new spreadsheet and key in the information as it appears above. Perform each of the following:
 - i. Insert a row above row 1;
 - ii. Merge and center cells A1 TO F1;
 - iii. Key in the text “TRUCKS AND DRIVERS EARNINGS” in the merged cells.
- B. Using a function and cell addresses only compute:
 - i. grand total for each truck for the three months;
 - ii. the commission for each truck driver based on the given criteria.

Criteria	Percentage of Grand Total
Less than or equal to 700,000	5%
Greater than 700,000	10%

- iii. Create a pie chart that compares the earnings of all trucks drivers for the three months and insert the chart title as “Truck Earnings”.
- C. In I2, type “County” and under it computer any five counties for each driver from drop down generated using list function
- D. Using list function, apply two colors; one to highlight earnings below 34999, and another to highlight earnings above 35000 for January
