ACCESS CLASSWORK

A. TABLES (Database Practical)

Table Design

Open and existing company database that you already created from the previous classes and perform the tasks below;

1. Create a table named **Staff** with the following fields:

- StaffID (Auto Number)
- FullName
- Gender (lookup wizard)
- Department
- JobTitle
- HireDate (Must not be later than current date)
- PhoneNumber (input Mask; +254_____)
- Salary (must be greater than 24,900)

2. Create another table called **Departments** with:

- DepartmentID
- DepartmentName
- Location
- Email

Data Entry & Manipulation

3. Insert at least 6 employee records into the Employees table.

B. FORMS

Using form wizard, design a staff form and Department form called **Registration_Form** and **Departmental** respectively to enter employee details.

Form Controls

Add the following controls to a form:

- Current date
- Add, Submit, delete, print go to next, go to previous and refresh form buttons

Activate pop-up and modal

Resize and align the textboxes, and resize the form to occupy as smaller space as possible on the screen.

Change background color of the form, text-boxes and text color, font and sizes of your choice.

Save your work and open form view. Use the two forms to update entries to the tables. (Upto 10 entries)
